

Credenti TecREACH

Okta Solution for
Mainland China

Overview: Credenti, headquartered in Houston, Texas, extends its expertise to overcoming geographic and regulatory challenges in Mainland China with TecREACH. This product is designed to optimize Okta's performance by addressing latency issues and adhering strictly to data privacy, data residency, and cross-border data transfer regulations prevalent in China, the Middle East, and other regions.

Solution Description: TecREACH enables reliable and compliant use of Okta services within Mainland China. It focuses on solving specific regional challenges such as latency and compliance with local data protection laws, ensuring that enterprises can deploy Okta effectively despite stringent regulations.

Key Features

- ▼ Enhances Okta's performance in regions with stringent data regulations.
- ▼ Addresses latency issues effectively, optimizing user experience.
- ▼ Ensures compliance with local data privacy and residency requirements.

Benefits

- ▼ Allows enterprises to expand their use of Okta into regulated markets without compromising on compliance or performance.
- ▼ Provides a seamless integration process that respects local regulations while maintaining high security and performance standards.

Additional Information

- ▼ Credenti's solutions are crafted to meet the specific needs of multinational corporations operating in sensitive and regulated environments.
