

Credenti TecUNIFY

Extending Okta SSO for Thick Client Applications

Overview: Credenti, headquartered in Houston, Texas, with global operations spanning Dubai and Hyderabad, has been at the forefront of technological innovation since 2004. The company's extensive experience in managing identity access through Okta projects stands testament to its capability.

Solution Description: Credenti TecUNIFY is a solution tailored for extending Single Sign-On (SSO) capabilities to thick client applications which traditionally lack federation capabilities and use external identity stores. It simplifies the user experience by reducing the need to remember multiple passwords.

Key Features

- ▼ Provides a seamless SSO experience, integrating thick client applications with modern identity management systems.
- ▼ Enhances security and compliance by allowing IT teams to implement complex passwords without relying on users to remember them.
- ▼ Significant reduction in help desk calls related to password retrieval.

Benefits

- ▼ Streamlines user access in a secure environment.
- ▼ Supports both traditional and modern applications without the need for multiple passwords.

Additional Information

- ▼ As a Gold Certified Okta Partner, Credenti offers unmatched expertise and comprehensive support around the clock.
